

# Neuromuscular Medicine Clinic

Dear Colleagues,

We have recently expanded our electrodiagnostic medicine lab (running 5 days / week). We are excited to introduce our **Neuromuscular Medicine Clinic**. This clinic has been setup to address the full spectrum of neuromuscular medicine disorders (including NCS / EMG):

- ❖ Entrapment Neuropathies (CTS / Ulnar Nerve / Other)
- ❖ Nerve Injury (Traumatic / Compressive / Ischemic)
- ❖ Peripheral Neuropathy (Metabolic / Toxic / Genetic)
- ❖ Complex Gait Pathologies (Balance / Neuropathy / Cerebellar / Myelopathic)
- ❖ Myopathy / Myositis
- ❖ Radiculopathy and Plexopathies (Idiopathic / Traumatic)
- ❖ Myasthenia Gravis / Lambert Easton Syndrome / Rare Neuromuscular Disorders

In addition to a general neuromuscular medicine program, integrated clinics include:

- ❖ **Rapid Access CTS / Ulnar Nerve Clinic:**
  - NCS / EMG – rapid availability based on referral / patient provided information;
  - Ultrasound Assessment and Guided Injections when indicated;
  - Bracing and Therapy availability (3D printed air flow night splints);
  - Plastic Surgery Involvement in all clinic programming and planning;
- ❖ **Rebalance<sup>MD</sup> Complex Nerve Injury Clinic:**
  - In conjunction with Dr. Krauss (plastic surgery / peripheral nerve fellowship), this clinic is specifically designed to address the following:
    - Nerve Injury;
    - Brachial Plexus Injury;
    - Nerve Transfer Assessment, Planning and Treatment;
    - Nerve Grafting and Repairs;
    - Severe Auto-Immune Plexopathies / Neuropathies;
    - Spinal Cord Injury Functional Neurological Assessments and Treatment;

We have provided a new referral form for the Neuromuscular Clinic (sample attached). Once referred, patients will be entered into a dedicated triage system aimed at reducing wait times based upon on the referral information and strategically collected patient reported symptom scores. This will allow us to address individual patient needs in a timely manner.

Our clinic will ensure appropriate diagnostic tests are completed, treatment plans are implemented, and appropriate ancillary referrals take place when indicated. We look forward to assisting you and your patients. Referral forms are available for download on at
